Routledge Handbook of Space Law

Edited by **Ram S. Jakhu** and **Paul Stephen Dempsey**

The global space economy reached \$330 billion in 2015, with a growth rate of 9% vis-a-vis the previous year. Consequently, Space Law is changing and expanding expeditiously, especially at the national level. At the international level, Space Law (both hard law and soft law) is expanding in certain areas, especially in satellite broadcast and telecommunications.

The Routledge Handbook of Space Law summarises the existing state of knowledge on a comprehensive range of topics and aspires to set the future international research agenda by indicating gaps and inconsistencies in the existing law and highlighting emerging legal issues. Unlike other books on the subject, it addresses major legal aspects of particular space activities and issues, rather than providing commentary on or explanations about a particular Space Law treaty or national regulation.

Part I: General Principles of International Space Law

Part II: International Law of Space Applications

Part III: National Regulation of Space Activities

Routledge Handbook of Corporate Law

Edited by **Roman Tomasic**

The Routledge Handbook of Corporate Law provides an accessible overview of current research in the field, from an international and comparative perspective.

In recent years there has been an explosion of corporations law research, as this area of law continues to develop rapidly throughout the world. Traditionally, Anglo-American corporate law theory has dominated debates and publications; however, this Handbook readdresses the balance by exploring the treatment of corporate law in both Europe and Asia, as well developments in the US and UK. Bringing together a wide range of key thinkers in the field, this volume is divided into five main parts:

- Theories of the Corporation
- The Corporate Constitution and Corporate Structure
- Corporate Governance and Control
- Shareholders and other Stakeholders
- Corporate Finance and Disclosure (after Enron and the GFC)

Global Health Law 2 volume set

International Law

Edited by **Gian Luca Burci**

This two-volume set gathers together some of the most significant contributions to the study of global health law. Global health law is a recent field of research in its own right, encompassing the relatively narrow core of international rules and institutions devoted to health protection and promotion, as well as the complex interactions between health and multiple areas of international law. By bringing such diverse perspectives into a single collection, together with an original introduction by the editor, this book will be an important resource for scholars and practitioners of public health and in legal and policy fields such as trade and investment, human rights and the environment.

"This is an indispensable collection of seminal contributions to global health law. Global health law has come a long way in a short time, but it remains in its infancy. The issues are huge, complex and vital—and they demand interdisciplinarity. As we search for global approaches to global health problems, these twin volumes of primarily legal perspectives will provide an extremely rich resource."

International Family Law 2 volume set

International Law

Edited by **Ann Laquer Estin**

This collection canvasses the growing literature on international family law, extending from the traditional private law governing cross-border families, to multi-lateral treaties on subjects such as child abduction and intercountry adoption, to the framework of international human rights law that shapes domestic and international family law systems. Volume I explores the internationalization of family law and considers adult relationships, whilst Volume II examines parent–child relationships.

Edited by a leading authority in the field, this collection will prove to be an invaluable and essential research tool for all international family law academics, researchers and practitioners.

"In this comprehensive two volume work, Professor Estin has gathered a rich array of articles by internationally known experts from many countries. It is a wonderful resource for anyone studying, researching or practicing in the increasingly global setting of contemporary family law."

Habermas and Law makes accessible the most important essays in English that deal with the application to law of the work of major philosophers for whom law was not a main concern. It encompasses not only what these philosophers had to say about law but also brings together essays which consider those aspects of the work of major philosophers which bear on our interpretation and assessment of current law and legal theory.

Development and Enforcement in the Arab States of the Gulf

Edited by **David Price**

This volume includes a range of topics addressing aspects of the current status of intellectual property (IP) protection regimes in the Gulf Cooperation Council and its individual member states, and aspiring GCC members Jordan and Yemen. It examines the opportunities and challenges facing the GCC in becoming a real union with common, or at least harmonized IP laws and regulations, while still allowing flexibility for domestic imperatives and interest.

**The Development of Jury Service in
Japan: A Square Block in a Round Hole?**

By **Anna Dobrovolskaia**

This book presents a comprehensive account of past and present efforts to introduce the jury system in Japan. Four legal reforms are documented and assessed: the implementation of the bureaucratic and all-judge special jury systems in the 1870s, the introduction of the all-layperson jury in the late 1920s, the transplantation of the Anglo-American-style jury system to Okinawa under the U.S. Occupation, and the implementation of the mixed-court lay judge (*saiban'in*) system in 2009.

**An Introduction to Court Interpreting
2nd edition**

Translation Practices Explained

By **Holly Mikkelsen**

An Introduction to Court Interpreting has been carefully designed to be comprehensive, accessible and globally applicable. Starting with the history of the profession and covering the key topics from the role of the interpreter in the judiciary setting to ethical principles and techniques of interpreting, this text has been thoroughly revised. The new material covers: remote interpreting and police interpreting; role-playing scenarios including the Postville case of 2008; updated and expanded resources.

**Islamic Law and Society in Iran:
A Social History of Qajar Tehran**

Royal Asiatic Society Books

By **Nobuaki Kondo**

The relationship between Islamic law and society is still an important issue in Iran under the Islamic Republic. Despite all the debates that began from the middle of the nineteenth century and which promoted legal reform, little was changed substantively in the area of the day-to-day practice of law in Iranian courts until the present day. This book provides an understanding of this legal system and its role in society, and offers a basis for assessing the motives and results of modern reforms as well as the modernist discourse.

国際法理論

Theory of International Law

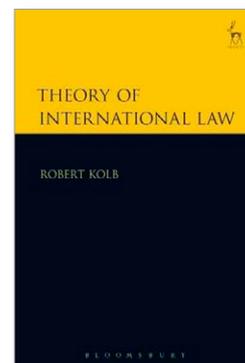

By **Robert Kolb**

This book seeks to analyse various aspects of international law, the link being how they structure and order the differing forces in the international legal order. It takes a threefold approach to the question:

First, the effort goes to determining the fundamental characteristics of international law, the forces that explain and impregnate its applications.

Second, the multiple relations between law and policy are analysed. Politics is a highly relevant factor for the implementation of each legal order (and also a threat to it); this is all the more true in international law, where the two forces, law and politics, are significantly close one to the other.

Third, the reflections concentrate on a series of fundamental socio-legal notions: the common weal, justice, legal security, reciprocity (plus equality and proportionality), liberty, ethics and social morality and reason.

Doe and Sandberg: Law and Religion

Edited by **Norman Doe** and **Russell Sandberg**

The editors of this collection argue that, since September 11, 2001, the short- and long-term implications of multiculturalism, religious resurgence, and extremism have dominated public life both globally and domestically. Consequently, the legal framework concerning the regulation of religion has changed dramatically over the last decade or so. There have been numerous developments at the global, regional, state, and sub-state level, and these changes have been accompanied by an unprecedented number of high-profile cases affecting religious individuals and groups.
