批評の失敗：近代日本と別の読み方の可能性

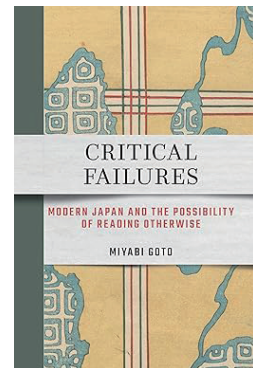

### Critical Failures: Modern Japan and the Possibility of Reading Otherwise

Goto, Miyabi

(Cornell East Asia)

2026 : 03 258 p. Hardback 9781501785665 US\$145.00 Paperback 9781501785672 US\$34.95

『批評の失敗』は、日本における近代批評の初期実験の見過ごされがちな混沌に焦点を当てる。明治時代、若き知識人たちは、批評の技術を身につけることこそが、日本が国際舞台で躍進するために不可欠であると考えた。しかし、理論的な体系化や高い理想を掲げながらも、実際の読書実践は理想に届かないことが多かった。著者は、この理論と実践のギャップ、すなわち --- 批評の「失敗」 --- こそが、批評の新たな可能性を切り開く契機となったと論じている。

### Public Policy Writing That Matters. 3rd ed

Chrisinger, David

(Johns Hopkins U.P.)

2026 : 04 224 p. Paperback 9781421454306 US\$29.95

Effective public policy writing is a catalyst for meaningful societal change. Chrisinger argues that by mastering the craft of clear, concise, and compelling communication, writers can elevate their ability to influence decision-makers, mobilize communities, and drive lasting and positive change. The book combines practical advice, insightful analysis, and hands-on exercises to provide a comprehensive guide for readers who want to improve their policy-writing skills. Offering real-world examples and cautionary tales, it offers a step-by-step approach to crafting impactful policy analysis, leveraging evidence, and framing arguments persuasively.

### Making Care Work: Why Our Economy Should Put People First

Folbre, Nancy

(U. of California Pr.)

2026 : 03 384 p. Hardback 9780520405622 US\$27.95

From leading feminist economist Nancy Folbre, *Making Care Work* provides a compelling historical and economic account of care provision in the United States. Folbre traces the long and colorful history of resistance to bogus claims that only paid work "counts" and that employees in care services are always paid what they deserve. Explaining why care providers remain economically vulnerable today, she argues that more attention to the public benefits of care provision could help build the political coalitions needed to implement policies that put people first.

**Queering Economics: Reimagining the Dismal Science**

Roncolato, Leanne & Martell, Michael E.

(U. of California Pr.)

2026 : 05 296 p. Hardback 9780520413290 US\$27.95

Despite its tremendous influence, economics is one of the least diverse and most exclusionary social science disciplines. In this book, Michael E. Martell and Leanne Roncolato reveal how economics has created a dangerous hierarchy that deters dissent and marginalizes underrepresented voices. They argue that diversification can benefit the field. By highlighting the voices of LGBTQ+ economists and utilizing qualitative and quantitative data, the authors accompany their call to action with a step-by-step plan for queering economics. Drawing on critical race, feminist, and queer perspectives and movements, *Queering Economics* shows how making economics inclusive has multiple tangible benefits.

**Ladder or Lottery: Economic Promises and the Reality of Who Gets Ahead**

Hoover, Gary A.

(U. of California Pr.)

2026 : 02 200 p. Hardback 9780520402621 US\$27.95

This book asks the reader a simple question: Is our economy a ladder or a lottery? Are people able to control their position on the economic spectrum by their actions? Some argue that, in our market-based economy, if you play by certain rules and make certain choices, you'll achieve upward mobility no matter what economic position you were born into. Drawing on his vast economic expertise, Gary A. Hoover explores what this "social contract" requires of its citizens, and what it offers in return. Hoover shows how civil unrest is often directly related to broken society-level promises, exploring protest movements such as Occupy Wall Street, the Tea Party, the Arab Spring, and student debt forgiveness as case studies. He also predicts where future protests can be expected if results promised are not results delivered.

**Racism at Work**

Siu, Bobby

(Univ. of Toronto Pr.)

2026 : 01 584 p. Paperback 9781049800219 US\$99.95

This book exposes the problems of the status quo by digging deep into existing institutional structures and processes and unearthing how they perpetuate social injustice. Management consultant Bobby Siu insists that legislation, civic administration, human resources policies and procedures, and union and employee responses to racism must be re-directed and re-structured to achieve the complete elimination of racism in employment. This book also recommends concrete political actions, reform in legislation, public policies and education, organizational programs, workplace practices, and enforcement mechanisms to remove system defects and recalibrate them in a new direction. Based on research studies and jurisdictional experiences, the recommendations presented have the power to better the lives of all people in the labour force.

**Affect As Cultural Critique: Methods for Anthropological Discovery**

White, Daniel et al.

(Univ. of Toronto Pr.)

2026 : 03 312 p. Paperback 9781487559793 US\$38.95

In line with growing movements to decolonize the academy, the essays in *Affect as Cultural Critique* feature ethnographic accounts of people actively describing, experimenting with, and otherwise exercising affect in ways that challenge the academy's inherited models for analyzing emotional life. Through an experimental collection of traditional ethnographic essays and artist-activist-generated critiques, this volume explores how everyday modes of feeling function as methods of knowing. By centering non-academic and non-Western affective practices as answers to traditional theoretical problems generated primarily by Western theorists, *Affect as Cultural Critique* seeks new trajectories for the discipline through a reciprocal practice of uncovering as a guiding professional aim, as methodological inspiration, and as a source of reflexive critique of the discipline's philosophical and theory-heavy analytics.

Wilson introduces readers to the hidden world of AI-behind the doors of chip design labs, coding bootcamps, and organizations teaching AI to speak dozens of languages. He meets philosophers envisioning a future without disease or death, a Nobel Prize-winning scientist who warns of AI's existential risks, and ghost workers whose invisible labor powers the world's biggest tech platforms. He also speaks with writers, artists, and developers wrestling with the promise and peril of AI to find out what they really think of ChatGPT. Wilson's empathetic and thoughtful investigation provides readers a front row view on how AI is actually made.

During the COVID-19 pandemic, racist demagoguery fomented a campaign of terror against Asian Americans. But these attacks were part of a much longer pattern that made anti-Asian racism integral to the outbreak of white supremacist, misogynist, and colonial violence across 175 years of U.S. history. Written in the radical spirit of Howard Zinn, *American Peril* represents the culmination of thirty-five years of study and activism by award-winning scholar Scott Kurashige.

**Vol. 2: From the Sixteenth Century to the Present. 2nd ed**

2026 : 03 240 p. Paperback 9781487550332 US\$56.95

Encompassing prehistory to the twenty-first century, this two-volume collection features a wide array of sources from religious, legal, and medical texts to poetry, novels, sex manuals, plays, art, and photographs, drawn from every continent, to explore human sexuality across time. In Volume One, historian Mathew Kuefler delves into the eras from prehistory to the sixteenth century, touching upon themes including patriarchy, gender diversity, sexual norms in religious and medical traditions, and perceptions of sexual "others." Volume Two focuses on the modern period, addressing topics such as sexual thought among puritans and libertines, scientific influences, censorship, and sexuality as self-expression and liberation. Each volume is structured around thematic chapters, with twenty sources per chapter and five chapters per volume, allowing for use in both chronological and thematic teaching. This collection is ideal for courses in the history of sexuality or world history, gender and women's studies, sociology, or cultural studies.

### **We're Still Here: Regenerating Shrinking Cities from the Ground Up**

Ortiz-Moya, Fernando

(U. of California Pr.)

2026 : 03 332 p. Hardback 9780520421387 US\$95.00 Paperback 9780520421394 US\$29.95

Urbanist Fernando Ortiz-Moya argues that instead of chasing regrowth, cities can embrace their smaller size and build on their unique character and history to enhance life for those who remain. *We're Still Here* contrasts official responses to shrinkage with spontaneous bottom-up actions led by traditionally marginalized residents in the cities of Pittsburgh, Manchester, and **Kitakyushu**. These stories show how decline becomes a springboard for social and physical (re)construction and justice-driven urbanism - revealing both the limits of pro-growth planning and the seeds of a new approach that he calls "(Re)City-Making." Far from a cautionary tale, this book makes a convincing case for the shrinking city as a laboratory for innovative, people-centered urban policy and collective empowerment.

### **After Covid: The Health Impacts That Will Last Generations**

Gale, Jason

(Johns Hopkins U.P.)

2026 : 03 408 p. Hardback 9781421454245 US\$34.95

In this riveting account of the pandemic and its devastating ripple effects, Gale captures the pandemic's messy realities - the panic it spurred, the misinformation and political infighting that stood in the way of controlling it, and the heroic efforts by scientists and health care workers to contain it. Gale exposes what went wrong, what worked, and what continues to threaten us. From the pandemic's chaotic beginnings to the hidden toll of Long Covid, he examines how governments shaped - and sometimes warped - the public narrative around the pandemic. He documents the consequences still unfolding: the rise of chronic illness, the erosion of health care systems, the deepening mental health crisis, and the dangerous spread of anti-science extremism.

### **Becoming Ecological: Navigating Language and Meaning for Our Planet's Future**

Gladwin, Derek & James, Kedrick

(Univ. of Toronto Pr.)

2026 : 01 256 p. Hardback 9781487561864 US\$24.95

*Becoming Ecological* offers a fresh and empowering perspective on the natural world by insisting that our relationship with language can transform issues of sustainability and environmental catastrophe. The book explores how language, meaning, and communication can help us in the ongoing process of "becoming ecological" in our daily lives, encouraging us to listen, relate, and act with greater awareness. Language and literacy experts, Derek Gladwin and Kedrick James subvert the norms of focusing on data and policy in conversations surrounding climate change, and instead centre communication and dialogue as the catalyst for ecological transformation. A powerful and unprecedented reframing - they argue that language has the profound ability to renew our personal and social awareness and steer the course of our future as a society.

It is a critical time for environmental sociology. Against a backdrop of increasingly dynamic environmental and social change, contemporary scholarship must reorient itself to cut through the noise and directly confront the urgent socio-environmental questions of today. In *Environmental Sociology Now*, Jordan Fox, Ian Carrillo, J. P. Sapinski, and Diana Stuart have gathered original essays from many of the emerging scholars who are advancing new ideas and making innovative connections across disciplines to lay new foundations. Each essay centers on the prompt "What does a more interdisciplinary, more diverse, and more justice-oriented environmental sociology look like, and what does that mean for our collective future?"

**Democracy's Second Act: Why Politics Needs the Public**

MacLeod, Peter & Johnson, Richard

(Univ. of Toronto Pr.)

2026 : 02 224 p. Hardback 9781487517137 US\$34.95

In *Democracy's Second Act*, Peter MacLeod and Richard Johnson argue that the first act of democracy - anchored in voting rights and representative government - achieved extraordinary gains. Free elections, near-universal suffrage, and the peaceful transfer of power reshaped societies and expanded human freedom. But these achievements represent the promise of democracy, not its completion. Their book offers a hopeful, clear-eyed vision for what comes next. Drawing on groundbreaking citizens' assemblies in Ireland, Canada, and France - as well as democratic innovations from more than a dozen countries - MacLeod and Johnson show how we can build on the legacy of the first act by creating new institutions that tap into the talents, judgement, and capabilities of ordinary people. They make the case that the public isn't a risk to be managed, but a powerful resource ready to be harnessed and that the future depends on giving citizens real responsibility, not just a periodic vote.

2026 : 02 264 p. Hardback 9781487544843 US\$85.00 Paperback 9781487545444 US\$36.95

*Other Diplomacies and Canada: Representations and Connections Beyond the State* offers a comprehensive exploration of the diverse diplomatic roles played by Canadian-linked non-state actors. Moving beyond traditional, state-centric views of diplomacy, this book presents rich case studies spanning language activism, climate change, tourism, childhood, migration and diaspora, humanitarian work, international development volunteering, Indigenous diplomacy, and solidarity activism. By examining these varied forms of "other diplomacies," the book seeks to expand our understanding of diplomacy as a practice embedded in social relations and spaces far beyond official state channels.

Lind, Jennifer

*Cornell Studies in Security Affairs* (Cornell U.P.)

2025 : 11 244 p. Hardback 9781501784149 US\$29.95

Coupling hard data with razor-sharp analysis, Lind shows that China's ascent was fueled by what she calls "smart authoritarianism": a model of governance in which autocratic leaders temper tight political control with inclusive economic measures. By balancing proinnovation policies with tools of repression, China's leaders have obtained political control and economic growth. These smart authoritarians, Lind observes, are not the brass-knuckled dictators of the past - they are their polished Savile Row - clad progeny, and they are found not only in China but also in authoritarian regimes worldwide.

Wesley, Jared J. & Lewis, J. P. (ed.)

(Univ. of Toronto Pr.)

2026 : 04 300 p. Paperback 9781487566791 US\$69.95

This book is organized around three key themes in each region: political culture, party system, and recent elections. Readers will discover why some Western Canadians have embraced populist movements, why Quebecers continue to debate the future of their nation within Canada, how democracy in Atlantic Canada has evolved, why Ontario appears to be in the midst of another Progressive Conservative dynasty, and how northern territories are reshaping ideas of self-government. Political scientists Jared J. Wesley and J.P. Lewis have updated the second edition of *Big Worlds* with the latest data from the Consortium on Electoral Democracy (C-Dem), including responses to COVID-19, the rise of new political movements, and landmark elections. This book also features thematic chapters on regionalism and leadership to highlight the broader patterns that connect (and divide) the country.

2026 : 05 248 p. Hardback 9781487542153 US\$85.00 Paperback 9781487542160 US\$34.95

This volume establishes dossier creation as the foundational practice of all bureaucracies, despite differences in how it has been weaponized as a technique of power by different systems. In nine case studies, ranging from police dossiers in Nazi Germany to China's Hukou family dossier system, this book examines the evolution of surveillance in societies. Surveillance and society researchers Cristina Plamadeala and Özgün Erdener Topak engage in a diverse yet comprehensive study of this surveillance tool, looking at examples such as dossiers implicating former members of Zimbabwe's Central Intelligence Organization (CIO), dossiers used in Cold War-era Australia to monitor migrants from the Soviet Union, dossiers of colonial Japan's Unit 731, deployed in Manchukuo, in Northeast China, and dossiers mobilized for Canada's World War II conscription program. Deeply relevant and imperative, *Surveillance and the Dossier* seeks to understand the links between the infliction of state-violence and surveillance.

Many believe China's ascent will drive it to war with the United States. Yet this is far from inevitable; geography and nuclear weapons should ensure US security. The real danger, Glaser contends, lies in East Asia's territorial disputes, especially over Taiwan. To reduce the risk of war, Glaser makes a bold case for ending US security commitments to Taiwan and carefully calibrating its policies on protecting South China Sea maritime features. The United States should also strengthen its alliances with Japan and South Korea and eliminate unnecessarily provocative nuclear and conventional weapons policies. These measures, Glaser argues, would defuse China's biggest security concerns while preserving America's core strategic interests.

In this updated edition, emphasis is placed on the practical application of legal rules in an everyday context and the role that lawyers play in advising their business clients. The text is fully updated to reflect developments in case law and statutory reforms and cites dozens of new cases. The chapters on corporate governance and corporate social responsibility have also been significantly revised to reflect changes in how businesses are responding to environmental, social, and governance issues.

2026 : 02 258 p. Hardback 9781501785504 US\$130.00 Paperback 9781501785535 US\$34.95

In *Deference and Divergence in Regional Human Rights Courts*, Maria A. Sanchez tackles a central tension in global governance: how international human rights courts balance their mandates with the imperative to respect national sovereignty. Despite having similar mandates, the world's three regional human rights courts - the European Court of Human Rights, the Inter-American Court of Human Rights, and the African Court on Human and Peoples' Rights - interpret their authority differently, leading to uneven regional enforcement of global human rights principles.

*Fermenting for the Future* reveals the fascinating story of *tsukemono*, the rich variety of pickles that have been an integral part of the Japanese diet for over a thousand years. Today, industrial pasteurization and the decline of agrobiodiversity have led to the disappearance of many of the hundreds of traditional *tsukemono* along with their benefits to human health. While fermenting vegetables and fruit was once a task of domestic drudgery, Aya Hirata Kimura shows how the art of *tsukemono* can now be appreciated as a catalyst for sociocultural change amid a growing awareness of the drawbacks of antibiotic modernity.

1984年にみすず書房から刊行された『チーズとうじ虫—16世紀の一粉挽屋の世界像』の原本、待望の第5版

*The Cheese and the Worms* is an incisive study of popular culture in the sixteenth century as seen through the eyes of one man, the miller known as Menocchio, who was accused of heresy during the Inquisition and sentenced to death. In the fiftieth anniversary edition of this now-classic book, Carlo Ginzburg uses the trial records to illustrate the religious and social conflicts of the society Menocchio lived in.

### Asianism and the Fall of Empire: India's Road to Freedom

Mukherjee, Mithi

California World History Library, 35 (U. of California Pr.)

2026 : 03 344 p. Hardback 9780520425811 US\$95.00 Paperback 9780520425828 US\$29.95

Offering a new global perspective on modern Indian history, *Asianism and the Fall of Empire* identifies the rise of Asianism in the early twentieth century as the origin and primary driving force of resistance movements that brought down the British Empire. Mithi Mukherjee ties together into a single sweeping narrative two contrasting, conflicting forms of anticolonialism: the emergence of nonviolent resistance movement under Mahatma Gandhi in South Africa and the militant movement culminating in the war on British India by the Indian National Army under Bose in alliance with the **Japanese army**. Asia emerges in this breakthrough retelling not as an inert geographical category, but instead as a singular agent of change in modern world history.

### States of Admission: Japan's Foreign Labor Politics in Regional Comparison

Kalicki, Konrad

(Cornell U.P.)

2026 : 06 252 p. Hardback 9781501787799 US\$145.00 Paperback 9781501787805 US\$34.95

Japan's labor migration policy resists easy explanation. Although Japan pioneered foreign labor admission in East Asia in the early 1990s, it relied on side-door channels for select migrants. It was not until 2018 that Japan moved toward the direct admission pathways used in Taiwan and South Korea, even while retaining its original schemes. Konrad Kalicki argues that shifting perceptions of state security, channeled by executive politics, explain this trajectory. Pulled in opposing directions by security concerns and bureaucratic rivalry, Japan initially embraced a compromise approach. Centralization of policymaking and Prime Minister Shinzo Abe's leadership eventually led to reform that brought the country into regional alignment.

### The Rising Sea: Foundations of Algebraic Geometry

Vakil, Ravi

(Princeton U.P.)

2025 : 10 688 p. Hardback 9780691268668 ¥29,550

Decades ago, Mumford wrote that algebraic geometry “seems to have acquired the reputation of being esoteric, exclusive, and very abstract, with adherents who are secretly plotting to take over all the rest of mathematics.” The revolution has now fully come to pass and has fundamentally changed how we think about many fields of mathematics. This book provides a thorough foundation in the powerful ideas that now shape the landscape, with an informal yet rigorous exposition that builds intuition for understanding the formidable machinery. It begins with a discussion of categorical thinking and sheaves and then develops the notion of schemes and varieties as examples of “geometric spaces” before discussing their specific aspects. The book goes on to cover topics such as dimension and smoothness, vector bundles and their natural generalizations, and important cohomological tools and their applications. Important optional topics are included in starred sections.

### Tensor Calculus for Physics: A Concise Guide. 2nd ed

Neuenschwander, Dwight E.

(Johns Hopkins U.P.)

2026 : 06 248 p. Hardback 9781421454474 US\$89.95 Paperback 9781421454481 US\$54.95

Tensors' true elegance lies in how they transform: when coordinates change from one system to another, tensors follow the same rules, allowing physical laws to retain their form across perspectives. Students are often introduced to tensors piecemeal through the inertia tensor in classical mechanics or the polarization tensor in electricity and magnetism. While useful, this fragmented approach does not prepare the student for tensor features such as affine connections, dual basis vectors, and covariant derivatives they will encounter in advanced studies such as general relativity, continuum mechanics, or non-Euclidean geometry. This concise guide builds from the ground up, providing a clear, step-by-step progression that embeds tensors in contexts where their power becomes self-evident. This extensively revised second edition incorporates more illustrative examples and carefully designed homework problems to strengthen understanding. Now accompanied by a solutions manual, this edition is an ideal resource for courses in general relativity, covariant electrodynamics, continuum mechanics, fluid dynamics, materials science, and any discipline where tensors illuminate the structure of physical reality.
