The Plot Thickens: Illustrated Victorian Serial Fiction from Dickens to Du Maurier

Leighton, Mary Elizabeth & SurrIDGE, Lisa

Series in Victorian Studies (Ohio U.P.)

2018 : 12 424 p. Hardback 9780821423349 US\$85.00

In *The Plot Thickens*, Mary Elizabeth Leighton and Lisa SurrIDGE uncover this overlooked narrative role of illustrations within Victorian serial fiction. They reveal the intricacy and richness of the form and push us to reconsider our notions of illustration, visual culture, narration, and reading practices in nineteenth-century Britain.

Shakespeare the Illusionist: Magic, Dreams, and the Supernatural on Film

Forsyth, Neil

(Ohio U.P.)

2019 : 02 192 p. Hardback 9780821423363 US\$45.00

In *Shakespeare the Illusionist*, Neil Forsyth reviews the history of Shakespeare's plays on film, using the basic distinction in film tradition between what is owed to Méliès and what to the Lumière brothers. He then tightens his focus on those plays that include some explicit magical or supernatural elements - Puck and the fairies, ghosts and witches, or Prospero's island, for example - and sets out methodically, but with an easy touch, to review all the films that have adapted those comedies and dramas, into the present day.

The Pull of Politics: Steinbeck, Wright, Hemingway, and the Left in the Late 1930s

Cohen, Milton A.

(U. of Missouri Pr.)

2018 : 10 332 p. Hardback 9780826221636 US\$50.00

In the late 1930s, John Steinbeck, Richard Wright, and Ernest Hemingway wrote novels that won critical acclaim and popular success: *The Grapes of Wrath*, *Native Son*, and *For Whom the Bell Tolls*. All three writers were involved with the Left at the time, and that commitment informed their fiction. Milton Cohen examines their motives for involvement with the Left; their novels' political themes; and why they separated from the Left after the novels were published. These writers were deeply conflicted about their political commitments, and Cohen explores the tensions that arose between politics and art, resulting in the abandonment of a political attachment.

The Linguistics of Vocabulary

Hansen, Christine (ed.)

Languages and Linguistics (Nova Pub.)

2018 : 06 129 p. Paperback 9781536138603 US\$82.00

In this compilation, the authors open with an analysis of the formation of philosophical terminology in the history of Early-Modern Ukrainian culture; specifically, two philosophical concepts - dobro and blaho (добро and благо) - are the focus here. Both are related to notions of good and wellbeing, but contextual nuances may affect their discrete meanings rather significantly. The authors consider the manner in which these two words functioned in the works by the prominent 18th century Ukrainian philosopher Hryhorii Skovoroda by way of a study based on a close reading of thirteen of his colloquies. Following this, the authors aim to investigate the relationship between morphological awareness and reading in a language environment which is phonologically transparent and morphologically challenging, i.e., the Czech language environment.

Second Language Acquisition: Methods, Perspectives and Challenges

Baker, Doris Luft et al. (ed.)

Languages and Linguistics (Nova Pub.)

2018 : 11 372 p. Hardback 9781536143058 US\$230.00

Collectively, this book provides the most up-to-date review of our current knowledge about how the complexities of each of the linguistic registers across mathematics, science and social studies extends far beyond content-area vocabulary and warranting an intentional, purposeful focus on language, particularly academic English during content-area instruction. Moreover, the current disciplinary content standards demand the integration of discipline-specific language instruction within content-area instruction. To address these demands, the topics of the chapters in this book span content areas (ELA, mathematics, science, and social studies), topical areas (assessment, language growth, instruction, and professional development), and grade levels (preschool, elementary, and secondary). Each chapter provides a synthesis of the research on one of the specific topics, and it concludes with implications for practice and research.

A New Middle Kingdom: Painting and Cultural Politics in Late Choson Korea (1700-1850)

Park, J. P.

(U. of Washington Pr.)

2018 : 10 296 p. Hardback 9780295743257 US\$65.00

Historians have claimed that when social stability returned to Korea after devastating invasions by the Japanese and Manchus around the turn of the seventeenth century, the late Chosŏn dynasty was a period of unprecedented economic and cultural renaissance, in which prosperity manifested itself in new programs and styles of visual art. *A New Middle Kingdom* questions this belief, claiming instead that true-view landscape and genre paintings were likely adopted to propagandize social harmony under Chosŏn rule and to justify the status, wealth, and land grabs of the ruling class. This book also documents the popularity of art books from China and their misunderstanding by Koreans and, most controversially, Korean enthusiasm for artistic programs from Edo Japan, thus challenging academic stereotypes and nationalistic tendencies in the scholarship about the Chosŏn period.

Wyness, Gillian (ed.)

Major Themes in Education (Routledge)

2018 : 10 1412 p. Hardback 9781138669314 £850.00

Participation in higher education has never been greater, and governments around the world continue to invest huge sums of money in the sector, not least to encourage even more enrolment. Meanwhile, many countries are moving away from centralized, taxpayer-funded systems to more 'marketized' models. For these and other reasons, the intersection of economics and higher education has never been more apparent. Increasingly, economic principles are applied to analyses of education and education policy, as scholars and policymakers grapple with difficult questions, such as: how should the costs of higher education be shared between stakeholders? What are the 'drivers' of inequality in higher-education participation? And what is the appropriate role for government?

Park, Gene et al.

Cornell Studies in Money (Cornell U.P.)

2018 : 11 264 p. Hardback 9781501728174 US\$45.00

With Prime Minister Abe Shinzo's return to power, Japan finally shifted course at the start of 2013 with the launch of Abenomics - an economic agenda to reflate the economy - and Abe's appointment of new leadership at the BOJ. As *Taming Japan's Deflation* shows, the BOJ's resistance to experimenting with bolder policy stemmed from entrenched policy ideas that were hostile to activist monetary policy. The authors explain how these policy ideas evolved over the course of the BOJ's long history and gained dominance because of the closed nature of the broader policy network.

This two-volume reference work provides a timely update on how far the region has come in opening markets. It analyses the motivations or ostensible objectives of policies adopted in the past, the changing extent of the domestic price distortions involved, the economic effects of those policies at home and abroad, the political economy forces at work that brought about those policies and their subsequent reform, their consequences for international trade, economic welfare and poverty alleviation, and prospects for sustainable improvements in current policies. Case studies of major East Asian economies and Australia reveal how government priorities to assist farmers versus manufacturers has changed over the past century but especially since the 1980s, and how that has affected trade between natural resource-poor and resource-rich economies.

Empire of Hope asks how emotions become meaningful in political life. In a diverse array of cases from recent Japanese history, David Leheny shows how sentimental portrayals of the nation and its global role reflect a durable story of hopefulness about the country's postwar path. From the medical treatment of conjoined Vietnamese children, victims of Agent Orange, the global promotion of Japanese popular culture, a tragic maritime accident involving a US Navy submarine, to the 2011 tsunami and nuclear disaster, this story has shaped the way in which political figures, writers, officials, and observers have depicted what the nation feels.

Japan's Island Troubles with China and Korea addresses the prospects of and challenges to achieving resolutions in the island disputes, rather than focusing solely on the origins and the political roles they play in the domestic politics of the three nations. Furthermore, in taking an interdisciplinary approach, this book transcends existing studies, which focus on the domestic contexts of the disputes, and therefore avoids the pitfalls of nationalistic narratives. Instead, this book fills a theoretical and methodological lacuna in the academic literature, exploring how the islands could become a point of co-operation, rather than contention.

Much recent scholarship about human rights has severed this link between the Holocaust, the Universal Declaration, and contemporary human rights activism in favor of seeing the 1970s as the era of genesis. Morsink forcefully presents his case that the Universal Declaration was indeed a meaningful though underappreciated document for the human rights movement and that the declaration and its significance cannot be divorced from the Holocaust.

2018 : 08 256 p. Hardback 9780295743752 US\$90.00 Paperback 9780295743769 US\$30.00

Why Hebrew, here and now? What is its value for contemporary Americans? In *What We Talk about When We Talk about Hebrew (and What It Means to Americans)* scholars, writers, and translators tackle a series of urgent questions that arise from the changing status of Hebrew in the United States. To what extent is that status affected by evolving Jewish identities and shifting attitudes toward Israel and Zionism? Will Hebrew programs survive the current crisis in the humanities on university campuses? How can the vibrancy of Hebrew literature be conveyed to a larger audience?

Buddhist and Islamic Orders in Southern Asia: Comparative Perspectives

Feener, R. Michael & Blackburn, Anne M. (eds.)

(Univ. of Hawaii Pr.)

2018 : 11 232 p. Hardback 9780824872113 US\$68.00

Over the last few decades historians and other scholars have succeeded in identifying diverse patterns of connection linking religious communities across Asia and beyond. Yet despite the fruits of this specialist research, scholars in the subfields of Islamic and Buddhist studies have rarely engaged with each other to share investigative approaches and methods of interpretation. This volume was conceived to open up new spaces of creative interaction between scholars in both fields that will increase our understanding of the circulation and localization of religious texts, institutional models, ritual practices, and literary specialists.

ゴー・チョクトン（元シンガポール大統領）伝 第1巻

Tall Order, Vol. 1: The Goh Chok Tong Story

Peh, Shing Huei & Goh, Chok Tong

(World Scientific)

2018 : 11 300 p. Hardback 9789813276048 ¥7,670

Goh Chok Tong was an improbable Prime Minister for an unlikely country. He had neither the connections nor the cunning to rise to the top, and was even once famously derided by his mentor Lee Kuan Yew for being "wooden" in his communication skills. *Tall Order* tells the extraordinary story of his life and career over half a century, revealing how Singapore's second Prime Minister rose through a combination of strength, wit and a political nous which many, including himself, did not know he had. In this first of two volumes, Goh navigated years of a challenging apprenticeship to Lee, scoring numerous policy successes but also suffering political blows and humiliation.

Overcoming Ptolemy: The Revelation of an Asian World Region

Gunn, Geoffrey C.

AsiaWorld (Lexington Books)

2018 : 12 324 p. Hardback 9781498590136 US\$115.00

With its focus upon the macro-region termed India Extra Gangem, literally the space between India and China, the book unfolds a fourfold agenda. First, it explains the Ptolemaic world system back to classical points of reference as well as to its reception in late medieval Europe from Arabic sources. Second, it tracks the erosion of the Ptolemaic template especially in the light of new empirical data entering Europe from early travel accounts as well as the first voyages of discovery. Third, through selected examples, as with India, Southeast Asia, and China, it seeks to expose textual and cartographic adjustments to the classical models flowing from the scientific revolution. Fourth, through an examination of Jesuit astronomical observations conducted at various points in Asia, it demonstrates how Eurasia was actually measured and sized with respect to its true longitudinal coordinates such had deluded Columbus and even succeeding generations.

Essential Cell Biology: (with Digital Product License Key Folder) (ISE). 5th ed

Alberts, Bruce et al.

(W.W. Norton)

2018 : 11 Paperback 9780393680393 US\$80.00

Essential Cell Biology has established itself as the premier introductory cell biology text because of its balance of readability and focus on the latest advances in the field. For the Fifth Edition, exciting new topics such as CRISPR, cryo-electron microscopy, culturing human organoids, advances in DNA sequencing, protein interactions, RNA synthesis and processing are included, continuing the emphasis on cutting-edge research. There are also expanded and updated sections on human evolutionary genetics, and three news sections on genetics and the causes of human disease. The text's readability is further strengthened by the addition of Karen Hopkin, a journalist and writer for *The Scientist* and *Scientific American*, to the author team. As before, molecular detail has been kept to a minimum to provide a cohesive conceptual framework for the basic science that underlies our current understanding of biology and medicine. All resources have been completely revised and updated, and the text now includes access to an ebook, animations, and Smartwork5, Norton's innovative online homework platform.
