Making the case that legal issues are central to James Joyce's life and work, international experts in law and literature offer new insights into Joyce's most important texts. They analyze *Dubliners*, *A Portrait of the Artist as a Young Man*, *Giacomo Joyce*, *Ulysses*, and *Finnegans Wake* in light of the legal contexts of Joyce's day.

In a book that compares Virginia Woolf's writing with that of the novelist, actress, and feminist activist Elizabeth Robins (1862-1952), Molly Hite explores the fascinating connections between Woolf's aversion to women's "pleading a cause" in fiction and her narrative technique of complicating, minimizing, or omitting tonal cues. Hite shows how *A Room of One's Own*, *Mrs. Dalloway*, and *The Voyage Out* borrow from and implicitly criticize Robins's work.

This book identifies the key rhetorical moves in academic writing. It shows students how to frame their arguments as a response to what others have said and provides templates to help them start making the moves. The fourth edition features many NEW examples from academic writing, a NEW chapter on Entering Online Discussions, and a thoroughly updated chapter on Writing in the Social Sciences. Finally, two NEW readings provide current examples of the rhetorical moves in action.

Beginning with the early works of Aristotle, the interpretation of the verb to be runs through Western linguistic thought like Ariadne's thread. As it unravels, it becomes intertwined with philosophy, metaphysics, logic, and even with mathematics - so much so that Bertrand Russell showed no hesitation in proclaiming that the verb to be was a disgrace to the human race.

*An Exploration of Writing* is a book about our alphabets, our syllabaries, and all the other kinds of writing that people use and have used for 5000 years. It introduces the general public to a topic that hardly anyone has heard about, so it clarifies basic linguistic terms as they occur. For linguists exploring the growing field of graphonomy - the study of writing systems - in which the author has long been a pioneer, it weaves together the many threads of theory into a tapestry showing a fuller picture of what all our scripts are seen to share.

2017 : 09 240 p. Hardback 9781781795774 £75.00 Paperback 9781781795781 £22.95

Linguistics is a subject which came to the fore only in the 1960s. It is founded on a fallacy. Linguistics claims to be 'the scientific study of language', but language behaviour is too open-ended and creative to be treated by the methods of science. In consequence, linguistic theories systematically distort the nature of language, and present a misleading picture of our human nature. Geoffrey Sampson shows how various traditions of linguistics, and their accounts of different aspects of language, are all infected by the delusion of scientism.

In this book, Leonard Talmy proposes that a single linguistic/cognitive system, targeting, underlies two domains of linguistic reference, those termed anaphora (for a referent that is an element of the current discourse) and deixis (for a referent outside the discourse and in the spatiotemporal surroundings). Talmy argues that language engages the same cognitive system to single out referents whether they are speech-internal or speech-external.

Language makes us human. It is an intrinsic part of us, although we seldom think about it. Language is also an extremely complex entity with subcomponents responsible for its phonological, syntactic, and semantic aspects. In this landmark work, Angela Friederici offers a comprehensive account of these subcomponents and how they are integrated. Tracing the neurobiological basis of language across brain regions in humans and other primate species, she argues that species-specific brain differences may be at the root of the human capacity for language.

The term 'Japanization' is often used by economists to describe long-term stagnation and deflation. Symptoms include high unemployment, weak economic activity, interest rates near zero, quantitative easing, and population aging. In the global context, what can governments do to mitigate the downward trends experienced by Japan? This judicious volume investigates in depth the causes of Japan's 'lost decades' versus the real recovery achieved by the United States, and the lessons that can be learned.

Now it is back with a vengeance, propelled by a groundswell of populists around the world. In *Straight Talk on Trade*, Dani Rodrik, an early and outspoken critic of economic globalization taken too far, goes beyond the populist backlash and offers a more reasoned explanation for why our elites' and technocrats' obsession with hyper-globalization made it more difficult for nations to achieve legitimate economic and social objectives at home: economic prosperity, financial stability, and equity.

The foreign currency denomination of contracts in international transactions can lead to international currency exposure at the country level with important economic and policy implications. When debts are denominated in foreign currency and revenues in domestic currency, exchange rate fluctuations can result in balance sheet effects for countries with either net asset or liability positions. Moreover, currency mismatch between assets and liabilities can be a cause for crises in developing and emerging economies. This book looks at the issues surrounding foreign currency exposure in today's increasingly integrated world economy.

Livingston, John W.

(Routledge)

2017 : 10 1068 p. Hardback 9781138299399 £225.00

This is a study of science in Muslim society. The first volume starts at the rise of science in the eighth century and explores the efforts of nineteenth century Muslim thinkers and reformers to regain the lost ethos that had given birth to the rich scientific heritage of earlier Muslim civilization. The second volume reveals the undermining effect of European imperialism on western-oriented religious reformers and secular intellectuals, for whom science and political reform went together, and concludes with a chapter on the state of science in contemporary Muslim societies and the efforts to institutionalize science today.

## Arc of Utopia: The Beautiful Story of the Russian Revolution

Chamberlain, Lesley

(Reaktion Books)

2017 : 10 256 p. Hardback 9781780238524 £20.00

*Arc of Utopia* offers a fresh look at the German philosophical origins of the Russian Revolution. Lesley Chamberlain relates how the influential German philosophers Kant, Schiller and Hegel were dazzled by contemporary events in Paris, and how art and philosophy exploded on the streets of Russia, with a long-repressed people uniquely reinventing the principles of liberty, equality and fraternity.

Ali, Tariq

*Russian Revolution 1917* (Verso)

2017 : 04 288 p. Hardback 9781786631107 £16.99

On the centenary of the Russian Revolution, Tariq Ali explores the two major influences on Lenin's thought - the turbulent history of Tsarist Russia and the birth of the international labour movement - and explains how Lenin confronted dilemmas that still cast a shadow over the present. Is terrorism ever a viable strategy? Is support for imperial wars ever justified? Can politics be made without a party? Was the seizure of power in 1917 morally justified? Should he have parted company from his wife and lived with his lover?

## Family Networks and the Russian Revolutionary Movement, 1870-1940

Turton, Katy

(Palgrave Macmillan)

2017 : 11 245 p. Hardback 9780230393073 EUR89.99

This book explores the role played by families in the Russian revolutionary movement and the first decades of the Soviet regime. While revolutionaries were expected to sever all family ties or at the very least put political concerns before personal ones, in practice this was rarely achieved. In the underground, revolutionaries of all stripes, from populists to social-democrats, relied on siblings, spouses, children and parents to help them conduct party tasks, with the appearance of domesticity regularly thwarting police interference.

Slezkine, Yuri

(Princeton U.P.)

2017 : 08 1096 p. Hardback 9780691176949 ¥5,470

Yuri Slezkine's gripping narrative tells the true story of the residents of an enormous Moscow apartment building where top Communist officials and their families lived before they were destroyed in Stalin's purges. A vivid account of the personal and public lives of Bolshevik true believers, the book begins with their conversion to Communism and ends with their children's loss of faith and the fall of the Soviet Union.

*The Yale-Hoover Series on Authoritarian Regimes* (Yale U.P.)

2017 : 06 328 p. Hardback 9780300179415 US\$65.00

In a shocking new study of life and death in Stalin's Gulag, historian Golfo Alexopoulos suggests that Soviet forced labor camps were driven by brutal exploitation and often administered as death camps. The first study to examine the Gulag penal system through the lens of health, medicine, and human exploitation, this extraordinary work draws from previously inaccessible archives to offer a chilling new view of one of the pillars of Stalinist terror.

Douds, Lara

(Bloomsbury Academic)

2018 : 02 224 p. Hardback 9781474286701 £85.00

Lara Douds examines the practical functioning and internal political culture of the early Soviet government cabinet, the Council of People's Commissars (Sovnarkom), under Lenin. This study elucidates the process by which Sovnarkom's governmental decision-making authority was transferred to Communist Party bodies in the early years of Soviet power and traces the day-to-day operation of the supreme state organ.

*Russian Revolution 1917* (Verso)

2017 : 09 192 p. Hardback 9781786631886 £12.99

V. I. Lenin's originality and importance as a revolutionary leader is most often associated with the seizure of power in 1917. But, in this new study and collection of Lenin's original texts, Slavoj Žižek argues that his true greatness can be better grasped in the last two years of his political life.

This book investigates the wartime role of Emperor Hirohito and the transition of the Emperor System, a structure which had been in place for a large period of Japanese history, and one undergoing significant change due to a series of intense encounters with Western-style modernity since the Meiji period of the late nineteenth century. Specifically, it explores moments in three episodes of social reality that were part of the wartime experience of the Japanese people: namely, the initiation of the conflict, accomplishing an end to the war, and the transition to post-war society.

The volume *The Asia-Pacific Region* looks at colonialism in the Philippines, China, Japan, and Vietnam, emphasizing the robust trans-regional networks that existed before European contact. Southeast Asia had long been influenced by Buddhist, Hindu, and Muslim traders in ways that helped build the region's ethnic and political divisions. Essays show the complexity and significance of maritime trade during European colonization by investigating galleon wrecks in Manila, Japan's porcelain exports, and Spanish coins discovered off China's coast.
